Hagerstown 301.797.8554
 2100 Old Farm Drive, Suite D
Frederick

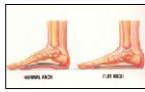

Heel Pain

Most heel pain can be treated with orthotics (custom-molded shoe insoles), injection therapy or other effective non-surgical methods, including new shock-wave treatment.

Flat Feet

Flat feet can be corrected simply with a custom molded orthotic device. This will give the foot the proper support it needs and relieve any pain you are experiencing!

Foot Warts

Get laser treatment and remove nature's unsightly blemishes FAST!
 Cantharone may also be used to remove the wart.

Diabetic Neuropathy

Do you have burning, numbness or tingling in your feet? This can indicate a condition of the nerves called Neuropathy. We have a new, effective treatment available for Diabetic and non-Diabetic Neuropathy.

Hammertoes

A hammertoe is a buckling of one or more of your small toes. They are a major cause of corns. In office procedures or a gel pad can help with this and usually surgery is not needed.

Ball Of Foot Or Toe Pain

Pain in the ball of the foot or toes can indicate misalignment of foot bones or a painful nerve condition called a neuroma. The majority of such conditions can be treated non-surgically.

Ingrown Nails

Why suffer constant discomfort and the risk of infection? This condition can be permanently corrected in our office.

Fungal Nail

Do You Suffer From Unsightly Discolored Nails? WE CAN HELP! Reserve Your Appointment Today For Evaluation With Dr. Michaels.
