Foot Pillows

In the office in under one minute we can inject padding that is all natural and it takes the pressure off your bones or callus. Do this simple fix instead of surgery!

Heel Pain

Most heel pain can be treated with orthotics (custom-molded shoe Insoles), injection therapy or other effective non-surgical methods, including new shock-wave treatment

Flat Feet

Flat feet can be corrected simply with a custom molded orthotic device. This will give the foot the proper support it needs and relieve any pain you are experiencing!

Foot Warts

Get laser treatment and remove nature's unsightly blemishes FAST! Cantharone may also be used to remove the wart.

Diabetic Neuropathy

Do you have burning, numbness or tingling in your feet? This can indicate a condition of the nerves called Neuropathy. We have a new, effective treatment available for Diabetic and non-Diabetic Neuropathy.

Hammertoes

We can fix hammertoes in the office in under two minutes without pain! You can put on your shoes and walk out of our office and go back to work or school the same day!

Ball Of Foot Or Toe Pain

Pain in the ball of the foot or toes can indicate misalignment of foot bones or a painful nerve condition called a neuroma. The majority of such conditions can be treated non-surgically.

Ingrown Nails

This condition can be permanently corrected in our office painlessly in under two minutes.

Fungal Nails

Do you suffer from unsightly discolored nails? We have lasers and other treatments that work great, are painless and have no bad side effects.
